

WOLF OF TECH STREET

Step into the world of scientific innovation, where every investment, experiment, and decision can determine whether a breakthrough becomes the next major venture. Venture Capital Challenge combines scientific reasoning with strategic investment, innovation, and entrepreneurship.

Delegates per team: 1-3

Round 1 :

The Scientific Stock Exchange combines scientific knowledge with strategic decision-making. Before each challenge, teams assess the potential of different scientific technologies and decide how much of their capital to invest. Successful research decisions increase company value, while failed experiments, poor investments, and unexpected market events can reduce their funding.

Delegates per team: 1

Round 2 :

The Innovation Marketplace challenges teams to transform scientific ideas into real-world startups. Through a competitive auction, teams use their capital (earned in round 1) to acquire technologies, materials, patents, expertise, and manufacturing resources before developing their own innovation.

Teams must explain the science behind their invention, identify the problem it solves, and demonstrate that it can realistically work.

Delegates per team: 3

Round 3 :

The Founder's Trial places finalists in the role of scientific founders presenting their innovations to a panel of scientists, investors, and industry experts. Teams must defend their technology, answer scientific and business challenges, and respond to unexpected problems introduced by the judges. The winning team will be determined by the strength of their science, creativity, feasibility, and ability to adapt under pressure.
